A new dawn on a new day

The past year has been challenging and uncertain, but it has also brought about opportunities for growth and change. At George Mason University, we have made significant progress in advancing our mission and vision, and we are excited to share some of our recent accomplishments with you.

In the News

Students, faculty, and staff at Mason have been working hard to ensure that our campus remains safe and healthy during the global pandemic. Our testing program has been critical in helping us understand the spread of COVID-19 and taking the necessary precautions to prevent its transmission. We would like to give a special thank you to the scientists, first responders, program administrators, and medical personnel whose tireless efforts have made this possible.

Celebrate Mason at 50

Throughout 2022, the George Mason University community will celebrate our first 50 years. From its origins as a branch campus of the University of Virginia to its current status as Virginia’s largest state university, Mason has experienced 50 remarkable years of growth and change.

Perhaps more importantly, Mason at 50 represents an inflection point in the university’s history. As we look to the next half century, we celebrate the university we are becoming, the most innovative, and most inclusive university.

The Task Force on Reimagining Faculty Roles and Rewards is seeking feedback on the proposed options from the Community Forum that took place in February. MASON SCIENCE COMMUNITY

Science Undergraduate Research Colloquium

The Undergraduate Research Colloquium is a platform for undergraduate students to present their research to a wider audience. This year, the event will be held on Wednesday, March 16, 2022, from 12:30 to 1:30 p.m. at the Exploratory Hall, Room 1309, and via Zoom. Students are encouraged to participate and present their research.

Join Valeriu Soltan, Professor, Mathematical Sciences, for a lecture on "Boundedly Polyhedral Sets and F-Combinatorics, Algebra and Geometry Seminar"

Join Lily Pfeifer, University of Oklahoma, for a lecture on "Loess in Eastern Pangea". The event will take place on March 10, 2022, at 4:30 to 5:30 p.m. in Room 1309 Exploratory Hall and on Zoom.

Galileo’s Science Café

Join Robin Couch, Chemistry and Biochemistry, for a lecture on "Canines, The Original Biosensors". This event will be held on March 11, 2022, at 12:30 to 1:30 p.m. via Zoom.

The College of Science's latest annual report is now available online. You can read the report in its entirety or browse the highlights.

India Education Diary

Mahamadi Warma recently published a total of 79 papers, with seven of those related to PDE, functional analysis, controllability, and Biochemistry. Warma has also contributed a chapter entitled "Towards the Mathematical sciences professor" to a recent publication. Warma is currently working on a project titled "A model for advancements in new biological systems" and is scheduled to publish an article on the topic in 2022.

Events

Students can now register to participate in the College of Science Colloquium. Judging the Colloquium requires many volunteers. If you are interested or would like to nominate a graduate student to be a judge, please email kprice@science.gmu.edu.

The College of Science Colloquium is scheduled for Wednesday, March 23, 2022. It will take place in the Exploratory Hall, Room 1309, and on Zoom.

The transformational road to get to this point was significant. Yet this important milestone signifies the dawn of a new day. At this juncture, I can't help but ask, 'How are we feeling?' Are we feeling good, or are we still struggling with the effects of the pandemic?

In my view, the journey our college community has completed, thus far, to address the COVID-19 global pandemic, has been an incredible achievement. The transformational road to get to this point was significant. Yet this important milestone signifies the dawn of a new day. At this juncture, I can't help but ask, 'How are we feeling?' Are we feeling good, or are we still struggling with the effects of the pandemic?

The college is exploring various options for the 2022-2023 academic year to accommodate an in-person experience for students and faculty. This includes reevaluating and updating the college’s mask requirements on Mason’s campus. The college is currently working on new guidelines for mask-wearing and other safety measures.

As we move past the current challenges, we look forward to a brighter future. The college community has a strong foundation and a shared commitment to excellence. Together, we can continue to build a vibrant and dynamic academic environment.

The college is committed to ensuring that all students have access to a high-quality education. We remain dedicated to providing a safe and welcoming environment for all members of the college community.

The college community has made significant strides in addressing the challenges posed by the pandemic. We are proud of the resilience and adaptability of our students, faculty, and staff.

As we move forward, we will continue to prioritize the health and well-being of our community. Together, we can build a strong and resilient college that inspires and educates the next generation of leaders.
