A UC San Diego chemical engineering graduate student created a mentoring program to help stand-out graduate student mentors connect with the Jacobs School of Engineering. The program, called GradAMP, connects UC San Diego undergraduate students interested in graduate school with graduate students and provides mentorship opportunities. It is designed to help students navigate the graduate school application process, explore research opportunities, and build valuable connections. The program aims to provide guidance and support to students throughout their academic journey, ensuring they are well-prepared for success in their future careers.

The Jacobs School of Engineering at UC San Diego is dedicated to preparing students for leadership roles in technology-driven industries. The school offers a range of undergraduate and graduate programs that focus on innovation, research, and real-world application. With a commitment to excellence in education and research, the Jacobs School prepares students to excel in a variety of fields, from engineering and computer science to the humanities and social sciences. The school's mission is to equip students with the skills and knowledge necessary to make meaningful contributions to society and to drive progress in their respective fields.

In addition to academic pursuits, the Jacobs School of Engineering fosters a culture of innovation and entrepreneurship. Students have the opportunity to apply their knowledge to practical, hands-on projects, such as the national bridge competition, where structural engineering students demonstrate their ability to design and construct bridges. These experiences not only enhance students' technical skills but also prepare them for leadership roles in the workforce.

The Jacobs School of Engineering recognizes the importance of a supportive and inclusive environment, which is reflected in its dedication to graduate student mentoring. By offering mentorship programs like GradAMP, the school ensures that students have the guidance and support they need to succeed. This commitment to supporting students is a hallmark of the Jacobs School's vision to prepare the next generation of leaders in technology-driven industries.
