Duke Pedestrians Named as NCGOVs: Assistant Secretary for CHILDREN and FAMILIES

Duke student Richard Whitehead and Professor Mary C. Waters have received the highest civic honor given by the state, named as North Carolina Governor's Civitan, or NCGOVs. 

Students Plant Change for Environmental Justice in Durham

Nearly 100 trees were recently planted in southeastern Durham with the goal of protecting the community against the negative health impacts of climate change.

Researchers Developing New "Country-Politan" Approach to Understanding North Carolina Politics

Researchers from Duke, North Carolina State University, and the University of Virginia recently published a new study on contemporary politics in North Carolina, offering fresh insights into why Democratic presidential candidates have lost North Carolina in 10 out of the last 11 elections, and why they won only one U.S. Senate race in the last 20 years and two in the last 30.

Researchers Launch New Resources to Help Measure the Benefits of NC's Natural and Working Lands

Duke University's Nicholas Institute for Environmental Policy Solutions launched a series of tools to make detailed information about North Carolina's forests, farmlands, and wetlands more accessible for land owners and decision makers. Covering more than 80 percent of North Carolina, the natural and working lands provide a variety of benefits to the state's people and economy: protecting water quality and supply, reducing flood risk, providing habitat for pollinators, and more.

Duke Designed Dashboards Map Benefits of NC's Natural and Working Lands

The NC Natural and Working Lands Dashboards enable users to quickly see those benefits by county, river basin, or land type.

Duke Team Provides Novel COVID-19 Care at Home

Thanks to a new collaboration, certain patients who test positive for COVID-19 can now receive intravenous monoclonal antibody therapy at their residence.

Duke Student’s Research on Language Barriers in Healthcare is Personal

Dr. Charlene Wong, a pediatrician at Duke University who recently named as the Assistant Secretary for Children and Families, was inspired to become a child doctor by her family's personal experience of her immigrant grandmother who struggled to communicate with patients from other cultures, an interest shaped by the experience of his immigrant grandmother who struggled to communicate with patients from other cultures, an interest shaped by the
