Three SCIENCE students win Goldwater Scholarships

Three SCIENCE students have been recognized as Barry M. Goldwater Scholarship recipients for 2019. Barry M. Goldwater Scholarships are an elite national scholarship presented by the U.S. government and are awarded to the top students in the United States in the fields of mathematics, natural sciences and engineering.

As an SCIENCE graduate, Barry M. Goldwater Scholarships student Rhett Rautsaw, a molecular ecology Ph.D. student, is honored that he got to be at the top. He says, "It's an honor to be one of the top students in the country in my field and I'm excited to continue my research and make a difference in the world." Rautsaw is studying under the mentorship of Dr. Joan Marler, a renowned expert in the field of ecology.

Other recipients include Undergraduate Scholarships winners, Grace Benn and Rami Major. Benn is studying under the mentorship of Dr. Jim Stoczynski, a distinguished scientist in the field of biology, and Major is studying under the mentorship of Dr. Tom Erck, a renowned expert in the field of chemistry.
