Here are some upcoming events and activities in the College of Science.

Three Minute Thesis Competition
Graduate students, can you distill your work into three minutes? Clemson's Graduate Student Competition is the perfect chance to challenge yourself. The Three Minute Thesis (3MT®) Competition is a worldwide phenomenon. This 3MT® contest is split into graduate students and Ph.D. candidates, so you don't have to be about to graduate to compete. There are three prizes in each category.

The competition encourages contestants to communicate the significance of their research in three minutes or less using only their voice and a PowerPoint presentation slide with no additional animation, videos, sounds or costumes. The contestants must condense their projects to a general audience in just three minutes. Each contestant must condense his or her research into a three minute presentation. The judges will select three winners from each category.

The Three Minute Thesis Competition is a great chance for students to practice their communication skills and showcase their research. The competition will be held on Oct 25-26. For more details and to register, click here.

Department of Mathematical Sciences becomes School of Mathematical and Statistical Sciences
As a reflection of its growing size and reputation, the College of Science's Department of Mathematical Sciences has officially transformed to the School of Mathematical and Statistical Sciences. Effective Oct. 1, the School of Mathematical and Statistical Sciences will operate as a fully autonomous school within the College of Science. This transformation is a testament to the department's growth and success in recent years.

The School of Mathematical and Statistical Sciences will continue to offer undergraduate and graduate programs in mathematics and statistics. The department has experienced significant growth in recent years, with an increase in enrollment and faculty. The transformation to a school will allow the department to better support its students and faculty, and to continue to grow and innovate.

There are plenty more events coming up in October and November, so make sure to check the College calendar for the latest.

Three SCIENCE faculty honored with prestigious NSF CAREER awards
Three Clemson School of Science faculty members have been named CAREER award recipients by the National Science Foundation (NSF). The NSF CAREER award is one of the most prestigious awards given to early-career scientists and engineers. The award provides funds for the recipient to develop a program that integrates research and education activities.

The NSF CAREER awards recognize excellence in research and education. The awards provide funds for the recipient to develop a program that integrates research and education activities. The recipients will use the funds to support their research and to develop educational programs for students.

Center for Human Genetics receives $1.87M grant
The National Institutes of Health (NIH) has awarded a $1.87 million grant to the Center for Human Genetics. The grant will support research aimed at understanding the complex roles molecular variations play in human disease.

The grant will fund a project to investigate the role of genetic variations in human disease. The project will involve the centers' researchers and will include collaboration with other institutions. The funding will support the centers' research and will help to advance our understanding of human disease.

With fall in full swing, there's excitement in the air!

I hope you all are enjoying the first full week of classes. If you have any questions or if there is anything the College can do to support you, please don't hesitate to reach out.

Remember, there are plenty more events coming up in October and November, so make sure to check the College calendar for the latest.

Go Tigers!
Have a fun and productive semester!
