Clemson students learn lifelong lessons

Diversity in Science
Seminar Series debuts

Three Minute Thesis Competition

Department of Mathematical Sciences becomes School of Mathematical and Statistical Sciences

College of Science graduate student wins nuclear technology award

Center for Human Genetics receives $1.87M grant

With fall in full swing, there’s excitement in the air!

In the past few weeks, you’ve likely noticed more seasonal events occurring. Formal wear is in style, and warm clothing is worn. As this change in the weather occurs, so do changes in the College.

In September, several fall students are exploring research opportunities. Students from various fields are interested in learning more about the stories that are being told in the College.

For example, the College of Science is exploring the potential of new research. The College is investigating the potential of new opportuni

Diversity in Science Seminar Series debuts

In November, the College will launch a new seminar series. The series will bring together students and faculty from different disciplines to discuss topics related to diversity in science.

Three Minute Thesis Competition

On Oct. 25-26, the College will host a competition called Three Minute Thesis (3MT®) Competition. Participation will build skills you’ll use for the rest of your career.

Department of Mathematical Sciences becomes School of Mathematical and Statistical Sciences

On Oct. 16, the College announced that the Department of Mathematical Sciences has officially transformed to the School of Mathematical and Statistical Sciences.

Drs. Robert Anholt and Trudy Mackay of Clemson University’s Center for Human Genetics have received $1.87 million from the National Institutes of Health to advance research aimed at significantly increasing our fundamental understanding of the complex roles molecular variations play in human disease.

Center for Human Genetics receives $1.87M grant

Center for Human Genetics director Dr. Trudy Mackay and research team members in Jordan Hall. During his dynamic presentation, Dr. Bartley shared why students of color should learn about their culture as it relates to their chosen professions.

Three SCIENCE faculty honored with prestigious NSF CAREER awards

In 2018, more than 120 students who aspire to become health professionals attended Tigers on Call and had the opportunity to engage with 70 health-care providers from around South Carolina. This Call and had the opportunity to engage with 70 health-care providers from around South Carolina. This
