With fall in full swing, there's excitement in the air!

Diversity in Science Seminar Series debuts

Mathematical Sciences has officially transformed to the School of Mathematical and Statistical Sciences. This is an exciting change in name, and it signals a commitment to excellence in both research and education. The School of Mathematical and Statistical Sciences will continue to focus on undergraduate and graduate education, as well as research in areas such as applied mathematics, statistics, and data science.

The Three Minute Thesis Competition (3MT®) is a competition that challenges research students to communicate the significance of their work in just three minutes. The competition is split into graduate students and Ph.D. candidates, so you don't have to be about to defend your dissertation to participate. The presentation should be focused on your research and its impact, and should be accessible to a non-specialist audience.

The School of Mathematical and Statistical Sciences will also provide resources and support to help participants prepare for the competition. The 3MT® competition will be held on Oct 25-26, and students are encouraged to register by Sept 15. For more details and to register, visit clemson.edu/3mt.

Department of Mathematical Sciences becomes School of Mathematical and Statistical Sciences

The Department of Mathematical Sciences has been transformed into the School of Mathematical and Statistical Sciences. This change in name reflects the School's focus on both undergraduate and graduate education in mathematics and statistics, as well as research in these fields.

The School of Mathematical and Statistical Sciences will continue to offer degrees in mathematics, statistics, and data science, as well as research opportunities in these areas. The School will also continue to provide resources and support to help students and faculty succeed in their academic and research endeavors.

The change in name will take effect immediately, and the School of Mathematical and Statistical Sciences will continue to be a key part of Clemson University's College of Science.
