Clemson students learn lifelong lessons
In the mountainous regions of Central America, Clemson pre-health students uncover disease. Clemson’s College of Science has received $1.87 million from the National Institutes of Health to advance research aimed at significantly increasing our fundamental understanding of the complex roles molecular variations play in human disease. Drs. Robert Anholt and Trudy Mackay of Clemson University’s Center for Human Genetics have been named acting director of the school. From left, College of Science Dean Cynthia Y. Young stands outside Martin Hall. Watch video about Dr. Trudy Mackay and the Center for Human Genetics.

Three Minute Thesis Competition
By identifying around any students who express interest and selecting the top five candidates, the Department of Mathematical Sciences has organized the Three Minute Thesis (3MT®) Competition on Oct 25-26.

Department of Mathematical Sciences becomes School of Mathematical and Statistical Sciences
As a reflection of its growing size and reputation, the College of Science’s Department of Mathematical Sciences becomes the School of Mathematical and Statistical Sciences.

Center for Mathematical Sciences becomes School of Mathematical and Statistical Sciences
From left, Michelle Johnson and Dale Smale are Clemson professors who have received recognition for excellence in teaching, mentoring, and student success. They have recently been named acting co-directors of the Center for Mathematical Sciences (CMS). The CMS is an interdisciplinary research and educational entity that supports the mathematical sciences at Clemson University.

Graduate students and faculty research in Clemson's Interdisciplinary Research in Science (CIRIS) Center.

Go Tigers!
Have a fun and productive semester!
Remember, there are plenty more events coming up in October and November, so make sure to check the College calendar for the latest.

College of Science graduate student wins nuclear technology award

The College of Science congratulates its own Dr. Nicole Bihorac, who recently won a nuclear technology award. Bihorac was one of five graduate students at the University of Tennessee who received the 2018 Nuclear Science Foundation Graduate Award.

College of Science student wins nuclear technology award

Dr. Abel Bartley shared why students of color should learn about their culture as it relates to their chosen professions and how this, paired with mentoring and role models, can influence their career trajectories.

College of Science Seminar Series debuts
While Dr. Bartley laid the foundation for why diversity is important, future guest speakers will share their college experiences with current students so that students can be exposed to real/tangible role models in STEM fields who look like them. Guests will share personal examples of their journeys to attaining their education and career goals and provide important, future guest speakers will share their college experiences with current students so that students can be exposed to real/tangible role models in STEM fields who look like them.
