Clemson students learn lifelong lessons

In “Diversity in Science” seminars, College of Science and graduate students share information about their current profession.

One guest was Dr. Abel Bartley, a neuroscientist who exposed students to the importance of diversity in STEM fields.

Dr. Bartley shared why students of color should learn about their culture as it relates to their chosen professions.

Finally, in a couple of weeks the Upstate will be flooded with alumni and friends coming back for Homecoming. This is such an exciting time of year! It is our job as the current residents of Clemson to make them feel excited to be back in Tigertown. Let's give them a warm welcome!

We would love to see SCIENCE students take the Clemson prize and go on to the regional contest. There are three prizes in each category.

Three Minute Thesis Competition

Students can sign up for their own 3MT competition by Sept. 26. Clemson Graduate Students can sign up on their own, or with professors Kevin James and Christopher Cox, the latter of whom is a former 3MT winner himself. Participants will build their presentations to your level of expertise.

We hope you are enjoying the fall semester. It has been great to see so many students active at SCIENCE events this year! Many of you attended the Study Abroad fair where Science Without Borders was showing our signature programs. Whether you graduated to compete. There are three prizes in each category.

Three Minute Thesis Competition
