Clemson students learn lifelong lessons

Department of Mathematical Sciences becomes School of Mathematical and Statistical Sciences

Seminars and activities will continue to provide a platform for students and faculty to engage with each other and gain knowledge. The College of Science remains committed to offering a variety of events and activities, ensuring that students and faculty alike are able to take part in the vibrant and dynamic community that exists within the College.

Here are some upcoming events and activities in the College of Science.

Three Minute Thesis Competition

Three Minute Thesis Competition returns to Clemson on October 25, with graduate and Ph.D. candidates from across the university vying for the chance to present their research in just three minutes. The competition is split into graduate students and Ph.D. candidates, so you don't have to be about to graduate to compete. There are three prizes in each category.

Three SCIENCE faculty honored with prestigious NSF CAREER awards

Three SCIENCE faculty were recently honored with prestigious National Science Foundation CAREER awards. These awards recognize early-career faculty who have the potential to make significant contributions to research and education. The recipients are Dr. Robert Anholt, Dr. Trudy Mackay, and Dr. David Sankoff.

Center for Human Genomics

Center for Human Genomics received $1.87 million from the National Institutes of Health to advance research aimed at significantly reducing the number of people who suffer from disease. Drs. Robert Anholt and Trudy Mackay of Clemson University’s Center for Human Genetics have received $1.87 million from the National Institutes of Health to advance research aimed at significantly reducing the number of people who suffer from disease. This funding will enable the team to continue their work in understanding the genetic basis of disease.
