Oracle PPM Cost Transfer Feature Launches December 21

Oracle PPM Cost Transfer is a new feature that allows cost transfers across different business units and projects. The feature is designed to improve financial management and streamline the process of transferring costs between different accounts.

Oracle PPM Cost Transfer is available via reports.ucsd.edu and new links will be provided.

Additional training focused on common activities (reconciliation, financials, reporting, corrective actions, etc.) performed by department fund managers will be made available via reports.ucsd.edu.

The following resources are available for you to learn the new cost transfer functionality:

- Oracle Report Roadmap
- Oracle PPM Cost Transfer Training
- University Cost Transfer Training

To add Oracle Report Roadmap to your favorites or bookmarks, please use the search function in your browser and then add the link as a bookmark. If you still don't see the reports, it could be a caching issue. You can try clearing your browser cache or using cache control in your browser settings.

Consistent with all new system launches, all standard financial reports will be removed from project reporting and cost center reporting. The reports will be made available via reports.ucsd.edu.

Oracle Project Information Lookup

This report provides information for COA and POETAF values for projects and is designed to bring back all projects, including those that have not been funded, and is searchable by Business Unit, FinUnit, and Project Manager. The report is available through multiple mediums, in an effort to support as many learning styles as possible. Please expect more information from us in the new year.
