Oracle PPM Cost Transfer Feature Launches December 21

Consider what we’ve recently done: dozens of financial reports are being managed online, across Oracle Financials Cloud (OFC) and Oracle PPM Cloud (OPPC). This includes new Oracle PPM cost transfer functionality, which is now available via reports.ucsd.edu and new links will be provided.

The new Oracle PPM cost transfer feature will allow users to:
- view cost transfers in OFC
- search for a project by their award, contract or task number.
- have not had accounting posted against them, and even those without an award, contract or task number.
- is searchable by Business Unit, FinUnit, and Project Manager. The report is designed to bring back all projects, including those that have not been funded. The report is published on https://reports.ucsd.edu, with links to request access and support.

Additional reports or report enhancements will be made available via reports.ucsd.edu and new links will be provided.

Oracle Financials Cloud production site has a variable quarterly maintenance window. The OFC quarterly updates - Every 3rd month (Mar, June, Sept, Dec). 3rd Friday of each month from 9 am - 5 pm, UTC. The OFC maintenance changes will impact OFC and the project financials view in Oracle PPM Cloud. The Oracle PPM cost transfer feature is based on the OFC maintenance schedule.

If the problem still persists, you could have a security issue. Please review the known transitional issues and corrective actions by department fund managers. If you still don’t see the reports, it could be a caching issue: if you are not logged into the portal, try clearing your browser cache, cookies, and browsing data. See the reports? Great! Just head on back to FRC and search away! The Oracle PPM cost transfer feature is part of improvement strategies for Oracle BI Reporting at UCSD. In the meantime, if you are using the report, please watch on-demand at your convenience.

If you have a project that is not showing in the report, please check the project’s status. If the project status is Closed, then it will not be visible. If the project status is Pending, then it may be in the queue. To request access, please visit the Services & Support page for a complete maintenance schedule.

Known Transitional Issues

We want to thank faculty & staff for their hard work and dedication to the university. We look forward to serving you in the new year.

Microsoft Business Financial Services

Oracle Cost Transfer and Financial Services have identified partnerships and collaboration between central teams, departments and support networks across the university. We are particularly grateful for the close partnerships and collaboration between central teams, departments and support networks across the university. We look forward to serving you in the new year.

Announcements

Oracle Financials Cloud (OFC) is now a primary way to view reports, the below helpful tip is for you:
- For beginners, the report is published on https://reports.ucsd.edu, with links to request access and support.
- Additional reports or report enhancements will be made available via reports.ucsd.edu and new links will be provided.
