Oracle PPM Public Transfer Feature Launches December 21

In preparation for the December 21 Oracle PPM Public Transfer Feature launch, the University Cost Transfer training provides a general overview of the new cost transfer functionality in the Financial Reporting Center. This includes a demonstration of the new Oracle PPM cost transfer feature and how to use it with the Financial Reporting Center.

Oracle PPM Public Transfer Feature

Oracle PPM Public Transfer Feature is designed to bring back all projects, including those that have not been funded, under the same project number. This report provides information for COA and POETAF values for projects and teams. Finance projects, teams, departments and support networks across the UC San Diego community.

How to Access and Run UCSD-DSH Project Information Lookup

12. Click on the Project Number and click Download.
13. The system will show the total project costs and the estimated costs.
14. Click on the Project Information Lookup button again.
15. Click on the Project Number and click Download.
16. The system will show the total project costs and the estimated costs.
17. Click on the Project Information Lookup button again.
18. Click on the Project Number and click Download.
19. The system will show the total project costs and the estimated costs.
20. Click on the Project Information Lookup button again.
21. Click on the Project Number and click Download.
22. The system will show the total project costs and the estimated costs.
23. Click on the Project Information Lookup button again.
24. Click on the Project Number and click Download.
25. The system will show the total project costs and the estimated costs.
26. Click on the Project Information Lookup button again.
27. Click on the Project Number and click Download.
28. The system will show the total project costs and the estimated costs.
29. Click on the Project Information Lookup button again.
30. Click on the Project Number and click Download.
31. The system will show the total project costs and the estimated costs.
32. Click on the Project Information Lookup button again.
33. Click on the Project Number and click Download.
34. The system will show the total project costs and the estimated costs.
35. Click on the Project Information Lookup button again.
36. Click on the Project Number and click Download.
37. The system will show the total project costs and the estimated costs.
38. Click on the Project Information Lookup button again.
39. Click on the Project Number and click Download.
40. The system will show the total project costs and the estimated costs.
41. Click on the Project Information Lookup button again.
42. Click on the Project Number and click Download.
43. The system will show the total project costs and the estimated costs.
44. Click on the Project Information Lookup button again.
45. Click on the Project Number and click Download.
46. The system will show the total project costs and the estimated costs.
47. Click on the Project Information Lookup button again.
48. Click on the Project Number and click Download.
49. The system will show the total project costs and the estimated costs.
50. Click on the Project Information Lookup button again.
51. Click on the Project Number and click Download.
52. The system will show the total project costs and the estimated costs.
53. Click on the Project Information Lookup button again.
54. Click on the Project Number and click Download.
55. The system will show the total project costs and the estimated costs.
56. Click on the Project Information Lookup button again.
57. Click on the Project Number and click Download.
58. The system will show the total project costs and the estimated costs.
59. Click on the Project Information Lookup button again.
60. Click on the Project Number and click Download.
61. The system will show the total project costs and the estimated costs.
62. Click on the Project Information Lookup button again.
63. Click on the Project Number and click Download.
64. The system will show the total project costs and the estimated costs.
65. Click on the Project Information Lookup button again.
66. Click on the Project Number and click Download.
67. The system will show the total project costs and the estimated costs.
68. Click on the Project Information Lookup button again.
69. Click on the Project Number and click Download.
70. The system will show the total project costs and the estimated costs.
71. Click on the Project Information Lookup button again.
72. Click on the Project Number and click Download.
73. The system will show the total project costs and the estimated costs.
74. Click on the Project Information Lookup button again.
75. Click on the Project Number and click Download.
76. The system will show the total project costs and the estimated costs.
77. Click on the Project Information Lookup button again.
78. Click on the Project Number and click Download.
79. The system will show the total project costs and the estimated costs.
80. Click on the Project Information Lookup button again.
81. Click on the Project Number and click Download.
82. The system will show the total project costs and the estimated costs.
83. Click on the Project Information Lookup button again.
84. Click on the Project Number and click Download.
85. The system will show the total project costs and the estimated costs.
86. Click on the Project Information Lookup button again.
87. Click on the Project Number and click Download.
88. The system will show the total project costs and the estimated costs.
89. Click on the Project Information Lookup button again.
90. Click on the Project Number and click Download.
91. The system will show the total project costs and the estimated costs.
92. Click on the Project Information Lookup button again.
93. Click on the Project Number and click Download.
94. The system will show the total project costs and the estimated costs.
95. Click on the Project Information Lookup button again.
96. Click on the Project Number and click Download.
97. The system will show the total project costs and the estimated costs.
98. Click on the Project Information Lookup button again.
99. Click on the Project Number and click Download.
100. The system will show the total project costs and the estimated costs.
101. Click on the Project Information Lookup button again.
102. Click on the Project Number and click Download.
103. The system will show the total project costs and the estimated costs.
