February is For You!

Campus Updates

Urgent Storm & Safety Information

The National Weather Service (NWS) issued a Flash Flood Watch, High Surf Advisory, Coastal Flooding Advisory, and Tornado Watch for Saturday and through Sunday (beginning after midnight tonight and continuing late into Sunday).

As of this morning, the NWS is predicting this weekend's storm (beginning after midnight tonight and continuing late into Sunday) will bring heavy rainfall with the potential for some flooding and cliff erosion in areas near campus and in Isla Vista.

The campus is located within a coastal area, and UCSB was previously classified as a "flood prone campus." While UCSB has improved its drainage systems, there is still a potential for flooding in heavy rain events.

Concerns about cliff erosion that may threaten the stability of a building in your neighborhood must also be reported to your property owner or manager.

Stay off of balconies and patios during heavy rain and storms.

Do not swim in the ocean for three days following rain because of potential for downed trees or branches, and of course, the increased risk of rip currents.

During rain and storms, stay out of the ocean, away from cliffs and beaches, and beach access areas. Unpredictable surf, waves, and high tides are a concern in heavy rain events.

Evacuate if your vehicle becomes stuck in high water.

Road Conditions/Closures: Caltrans website at http://www.dot.ca.gov/stateroads/

Santa Barbara County Storm Alerts & Resources: All UCSB community members are encouraged to sign up for Santa Barbara County alerts and notifications.

Santa Barbara County has agreements in place with the Red Cross to open up shelters as needed.

In the event of any displacement of residents due to storm events, the Red Cross is ready to help.
