February is for You!

Campus Updates

Sign Up & Safety Information

Vista. Certain areas west of Goleta and east of Santa Barbara are at an increased potential for some flooding and cliff erosion in areas near campus and in Isla Vista. The National Weather Service (NWS) issued a Flash Flood Watch, High Surf Advisory, Coastal Flooding Advisory, and Winter Weather Advisory for the Santa Barbara region.

As of this morning, the National Weather Service (NWS) is predicting 0.5-1.5 inches of rain possible by early Saturday morning in the Santa Barbara region.

The Santa Barbara County Alert System is available for those who want to receive notifications for their areas.

The Santa Barbara County Alert System

To access the Santa Barbara County Alert System, follow these steps:

2. Create an account using your email address. You will receive an email confirmation.
3. Log in to your account using your email address and password.
4. Add your location(s) by selecting the “Add Location” link.

UCSB Alerts System

UCSB Alerts is a campus-wide emergency notification system that sends alerts via email, text message, and voice notification to students, faculty, and staff. To ensure that you receive these messages, it is important to maintain your contact information in your campus email profile.

Safety Tips

For up-to-date forecast information:

To monitor the county preparedness website:

Members are encouraged to sign up for Santa Barbara County alerts and alerts for their areas.

In the event of any displacement of residents due to storm events, the County has agreements in place with the Red Cross to open up emergency shelters.

Immediate concerns about your apartment/house or property (roof leaks, dripping pipes, broken windows, etc.) should be reported to 911.

Vehicle

Driving, biking, and walking. If your car stalls in a flooded area, evacuate immediately.

Do not walk underneath cliffs, due to danger of rock falls and slides.

During rain and storms, stay out of the ocean, away from cliffs and beaches, and keep an eye out for strong waves and tidal currents.

Tides can be dangerous. During extremely high tides, the ocean may flood the bike paths and nearby roadways.
