

## August Specials

### NovaThread Lifts

**We are now offering NovaThreads!**

Special Introductory Pricing - starting at \$600/area

NovaThreads are an effective cosmetic technique that lifts and tightens sagging tissues without surgery. This office procedure involves the placement of fine, absorbable polydioxanone (PDO) threads similar to those used in medical procedures. These threads remain in the deep layers of the skin promoting collagen synthesis and tissue lift. After four to six months, the threads will be absorbed by the body but the collagen left in place will provide lift for a year and beyond.

NovaThread lift is done using local anaesthetic and takes about an hour. Side effects are minimal but may include swelling and mild discomfort that lasts 2-3 days. You will receive thorough instructions during your complimentary consultation.

PDO thread therapy can be used on the cheeks, jawline, neck, nasolabial folds, and marionette lines.

Please call **970-254-2400** to schedule a consultation. Appointment times are limited! The NovaThread Lift Special is offered with **April Ross, NP** and **Joyce Sekharan, MD**.
