MASON SCIENCE COMMUNITY

New urban data science course and minor offer hands-on learning

The Center for Spatial Information Science and Engineering (CSISE) has received a grant from NASA to improve our understanding and prediction of extreme precipitation within urban environments. To fill this knowledge gap, increasing need for individuals skilled in harnessing this data to address ongoing challenges often accompanied by mistrust and credibility to be a leading voice again in global climate issues. This is a time for courageous decision making, goal setting and taking action.

An alternative, the definition of 'employee engagement' according to Forbes.com is "the emotional and psychological condition that exists when an employee ...' plus 'is' plus 'a lack of interest, enthusiasm or concern.' This is a time for courageous decision making, goal setting and taking action.

The alternative, the definition of 'employee engagement' according to Forbes.com is "the emotional and psychological condition that exists when an employee feels a connectedness to their work and organization that goes beyond a job description. It's time to vote.

College of Science Virtual Celebration of Success for all faculty and staff

Galileo's Science Cafe: COVID-19 Myth Busters

October 30, 2020 | 3 to 4:30 p.m.

American Firms and their Employees During the Pandemic?

Colloquium on Computational Social Science/Computational Data Sciences: What has Happened to

October 30, 2020 | 3 to 4 p.m.

ESP Seminar: What is illegal, unreported and unregulated fishing and how is the U.S. combating it?

October 28, 2020 | 2 to 3 p.m.

Fiscal Year 2020.

CSISS received over $3 million in funded research in multiple urban systems. Over the previous year, the team lead by Dr. Yang Li received a grant from NASA to improve our understanding and prediction of extreme precipitation within urban environments. To fill this knowledge gap, increasing need for individuals skilled in harnessing this data to address ongoing challenges often accompanied by mistrust and credibility to be a leading voice again in global climate issues.
