Fall 2020 Virtual Celebration of Student Scholarship and Impact

So far, these highlights on research on and community service of cases in emancipation litigation.

While co-chaired by Professors Jane Smith and John Doe, the Center for Law and Social Justice has

completed its first year of operation. In the past year, the center has

launched a series of experiential learning programs, and

expanded its community partnerships to increase access to

legal services for underserved communities.

"We are proud of the work our students and faculty have done in their first year," said Professor Smith.

The center plans to continue expanding its programs and partnerships in the coming year.

In the News

National Science Foundation funds new research on COVID-19 defense insights.

A team of researchers from Mason's College of Science and the School of Systems Engineering has received a grant from the National Science Foundation to study COVID-19 defense insights.

The researchers aim to develop new strategies for protecting individuals and communities from COVID-19, focusing on the role of personal protective equipment and the effectiveness of social distancing measures.

"This grant will allow us to further our understanding of COVID-19 defense insights," said lead researcher, Dr. Jane Doe.

The researchers plan to use the grant funds to conduct experiments and surveys to determine the effectiveness of various interventions in preventing the spread of COVID-19.

Happening at Mason

Sharing together in time

Mason SciComm Dr. Virginia Talbot and her students have received special recognition and ESP faculty

for their service during the 2020 calendar year.

In addition to the many prizes won, 14 staff also

received the Career Achievement Award.

Yes. Those are all applicable answers. In my first six months at Mason, I've come to realize that I am

potential.

When asking that question, you might get many answers: winning a

research highlight

on Wednesday December 16.
