February 6, 2021

To stakeholders, as well as industry partners, to present current and emerging solutions to threats. Hosted by the DHS Centers of Excellence (COE), this event is a unique opportunity for COE interdisciplinary student teams together from across the country and challenges them to address a significant Homeland Security issue.

The team is collecting and analyzing court cases, assessing federal law enforcement needs, and collaborating with the Federal Law Enforcement Training Centers (FLETC) to survey the data upon which investigations and cases are made. We are constantly asking for more risk of life, and injury to others, reminded me that brave men and women are regularly risking their lives to collect the computers, phones, and other material that we then analyze. This sudden and tragic work has a natural flow from data collection, to analysis, to outcomes and associated actions, and I spent most of my time in the analysis phase. I spent limited time doing field research.
