A Reflection from our Humanist Chaplain
As the seasons transition and we move beyond the midway threshold of winter, change can be felt like the transition of the fall, with more energy or more layers depending on the day. We begin to ask: when will spring arrive? I think about our diverse climates across the continents, each place with its own seasons and each of us living in our layered contexts. While we share more similarity than difference as a species, our contexts create a multiplicity of opportunities as well as challenges.

While we cannot neglect the power of context, let us not forget the millones de pisadas pressed on the surface of this Earth where we wandered, wondered, and journeyed without human-made borders. We as a species once knew a time when important transitions were mostly seasonal, our humanity was nurtured en conjunto, and we were moved in our becoming by the stories, shared experiences, and memories of our ancestors. It wasn’t idyllic, but it is worth remembering. Through the many shifts and reconfigurations of our modern societies and places, let us seek a relationality that fosters collective flourishing, so that we may sustain a cycle that humanizes each other and embraces with sacred curiosity our lived experiences.

Àṣẹ,

Anthony Cruz Pantojas
Humanist Chaplain

**Chaplain Recognition**

Our chaplains do work and ministry in many settings, and contribute to their fields and communities through service, research, publications and more. In this new section, we will uplift their accomplishments whenever they are recognized externally.

Our Muslim Chaplain Najiba Akbar presented at the Association of Muslim Chaplain’s (AMC) Conference which took place virtually from February 11-13. Her session was titled: “The Enneagram and Islamic Spirituality: Using the Symbol as a Transformative Map on the Journey Home.” She spoke about the significance of the Enneagram as a spiritual self-assessment tool for chaplains and how it offers a unique pathway for psychospiritual growth and for compassionate stewardship of diverse communities. In her presentation she highlighted the connection between the content of the Enneagram framework and the traditional Islamic teachings on the struggle with the inner self and the necessity of self-observation as part of the spiritual path to liberation from the egoic self.
