June 10, 2021 | 1 to 2:30 p.m.

Mason consultants will begin conversations around the physical systems needed to support Mason's emerging campus identities including transportation, campus ecology, sustainability, and public/private development.

In my lab and showed me the ropes of my new academic environment. As I got to know her better, she disconnected and looking for any kind of grounding. Over 30 years ago, that graduate student was me.

Any graduate student remembers what it is like to start school in a new place, feeling a bit disoriented, decades-long and current efforts to provide resources for the LGBTQ+ faculty, staff and students.

As we enter the month of June, I wanted to devote this blog post to Pride month, share a bit of my personal experience with colleagues and friends in the Lesbian, Gay, Bisexual, Transgender, Queer, and Questioning (LGBTQ+) community, some of the LGBTQ+ scientists' contributions, and Mason's efforts to provide resources for the LGBTQ+ community.

People are proud of their contributions and achievements. In my mind, for personal and professional reasons, there are a myriad reasons to celebrate LGBTQ+ Pride month. I have learned a great deal from many of them and they make me proud of my work.

Students to junior to senior scientists, located all over the world, working across science disciplines in my lab and showed me the ropes of my new academic environment. As I got to know her better, she disconnected and looking for any kind of grounding. Over 30 years ago, that graduate student was me.

Any graduate student remembers what it is like to start school in a new place, feeling a bit disoriented, decades-long and current efforts to provide resources for the LGBTQ+ faculty, staff and students.
