In trying to understand our deceptive universe, Astrophysicist Hakeem Oluseyi examines spacetime, the illusion of mass, the large-scale structure of the universe, dark matter, and dark energy.

Get your tickets for the 2021 STEMNoire research conference and holistic wellness program intentionally designed to foster, celebrate, and connect individuals of all genders and LGBTQ+ identities including transportation, campus ecology, sustainability, and public/private development.

Mason consultants will begin conversations around the physical systems needed to support Mason's emerging campus identities including transportation, campus ecology, sustainability, and public/private development.

Mason's Office of Sustainability is part of a national network of campus sustainability offices working to advance sustainable practices and to create a greater understanding and appreciation of the environmental, social, and economic benefits of sustainability. As Mason implements strategies to meet its sustainability goals, the Office of Sustainability will be the central point of contact for Mason faculty, staff, and students.

Today, I want to update you on Mason’s COVID-19 safety policies. President Washington announced that all students, faculty, and staff on campus will be required to be fully vaccinated by the start of the fall semester.

In past years, Mason has required students to take part in a voluntary COVID-19 saliva test. This year, however, we will instead require all students, faculty, and staff to be fully vaccinated against COVID-19. In the coming weeks, we will provide details on what this means for students and employees. We look forward to welcoming you back to campus in the fall.
