Coded Bias prompts more inclusive science in society

Mission Statement
The Mason College of Science, through research, education, and service, enhances the quality of life and prepares students for a diverse, dynamic world by developing leaders in the sciences, applying knowledge to real-world problems, and enhancing public understanding of the sciences.

MASON SCIENCE IN THE NEWS

Mason graduate helps launch new degree program

Mason is proud to announce the new Environmental Science and Policy major, the first of its kind in the nation, which will allow students to pursue a dual concentration in environmental science and policy.

The new major, which will be offered in the Department of Environmental Science and Policy, will provide students with a comprehensive understanding of the complex issues facing the world today, including climate change, sustainability, and environmental justice.

The launch of the new major is a result of a grant from the National Science Foundation, which will provide funding for the first two years of the program. The Department of Environmental Science and Policy is excited to offer this new major to students who are passionate about making a difference in the world.

More on their research

Mason researchers use scent to create a more aware, inclusive, and thriving science and research environment.

The study, which was published in the journal PLOS ONE, found that using scent in the lab can improve the overall mood and productivity of researchers, leading to a more inclusive and collaborative workplace.

The researchers also found that using scent can help reduce stress levels, improving overall well-being and satisfaction among lab workers.

A five-year evaluative period.

The purpose of the QEP is to improve student learning or the student experience in a specific way over the course of a five-year evaluative period. Mason's Quality Enhancement Plan is the Inclusive Excellence Plan.

Submit feedback on your preferences.

In the QEP, Mason will work towards implementing changes that will improve the student learning environment and student experience, as well as the student success.

The College of Science is a proud sponsor of these events, which support our priorities noted in our Inclusive Excellence Plan.
