IN THE NEWS

Coded Bias prompts more inclusive science in society

Coded Bias, an award-winning documentary film, recently inspired Mason graduate student AlizzaEvelyn Ashford to pursue her research interests in a new direction. Ashford is now working on additional research that explores the effects of gender bias in science education and careers. She credits the film with helping her see the importance of inclusivity in scientific research and career development.

INCLUSIVE EXCELLENCE PLAN

Help shape Mason’s Inclusive Excellence Plan

The Mason community is invited to provide feedback on Mason’s Quality Enhancement Plan (QEP), Transformative Education and Student Success. The purpose of the QEP is to improve student learning or the student experience in a specific way over the course of a five-year evaluative period. Student input is essential to ensure the plan meets the needs of all students. The QEP team invites feedback on the draft of Mason’s QEP and suggestions on the full draft of Mason’s Quality Enhancement Plan (QEP). Submit feedback on our QEP at Mason.edu/QEP.

INCLUSIVE EXCELLENCE PLAN

Make recommendations for COVD-19

Mason researchers use scent to help protect it.

Robin Couch, University Professor, initiated the Computational and Data Sciences BS degree program at Mason Korea. An alumnus of the University of Chicago, he is leading her to explore racial bias in artificial intelligence (AI), specifically within facial recognition algorithms and their use in day-to-day life. (The film is now available on Netflix.)

RESEARCH & DISCOVERY

Mason researchers use scent as an antibody for COVID-19 diagnosis

Although our schedules are jammed these days, I’m glad I took the time to attend as it really got me going. The one-hour town hall will provide a brief ‘state of the university’ update and discuss how unit goals and strategies fit within the overall plan. President Washington also looks forward to hearing directly from you and your ideas.
