The gift — what did you do with your 2020?

By Kimberly M. Davidson

As we all reflect on the first months of 2021, I want to share some of what we accomplished in a year that was not easy. Throughout the pandemic, Mason Science has remained committed to supporting our community.

To begin with, we welcomed 141 new majors into the College of Science. This year, we have a number of students who have chosen to major in computational and data sciences. Mason Korea is also excited about welcoming a new class of students.

On the research front, we have received $36 million in funding. This year, we have received 20 new grants from the National Institutes of Health, and we have received $1.2 million in funding from the National Science Foundation. We have also received $1.2 million in funding from the National Institute of Standards and Technology.

In addition, we have also received $1.2 million in funding from the National Institute of Health. This year, we have received 20 new grants from the National Institutes of Health, and we have received $1.2 million in funding from the National Science Foundation. We have also received $1.2 million in funding from the National Institute of Standards and Technology.

We have also continued our efforts to improve the student experience. This year, we have invested in new technology and infrastructure to support remote learning. We have also continued to invest in our facilities and classrooms.

Our college has also continued to support our community. This year, we have provided critical resources to our students, such as mental health services and financial aid. We have also provided resources to our faculty and staff, such as professional development opportunities and support in managing work-life balance.

In this issue, we will continue to publish this newsletter on Wednesdays with a content deadline of the Monday prior. Our first issue of 2022 will be Wednesday, January 19. The last College of Science newsletter in 2021 will be on Wednesday, December 15. In 2022 we will continue to publish this newsletter on Wednesdays with a content deadline of the Monday prior.
