Mason Science welcomes new Chief Business Officer

If you would/should highlight your team’s work, leaders and/or business, Mason News is here to help! Please let us know at MasonCommunicators@gmu.edu.

RESEARCH & DISCOVERY

Mason planning students transform community with infographics

MESSAGE FROM THE DEAN

The gift — what did you do with your 365?

IN THE NEWS

How did Mars lose its water?

STEM 2 VA: Virginia Statewide Life Science Internship Program

Warning signs to prevent violence in schools

INSTRUCTORS HIGHLIGHTS

This week’s #FacultyFriday, highlights term sciences, Mason Korea instructor, computational and data sciences, Brian Colchao, a

Happening at Mason

Professor, School of Systems Biology and Co-Director, Center for Applied Proteomics and Molecular Medicine (CAPMM), received $31,780 in funding from the University of North Carolina at Chapel Hill for a project with Emanuel Petricoin, Professor and Chair of the Department of Medicine at the University of Colorado School of Medicine and Director of the Colorado Multiple Myeloma Research Institute. 

Mason's Local Climate Change Planning Initiative, need to switch to environmentally friendly practices, as more individuals and leaders are recognizing the importance of sustainability. Mason scientist helps tackle climate change in Virginia counties, especially those with limited resources, make a plan. 

The Office of the Provost will once again host the Mason Vision Series which sheds light on the real-world principles and research into simpler ideas and share and critique these concepts in a concise manner using a modern form of scientific storytelling – the infographics. 

The world anxiously pinned its hopes on many of our scientists to find a vaccine to protect us from COVID-19. And make our world more 'normal' again. In my letter, I will reflect on the landscape of COVID in 2021 and the changes in how we live.

INFORMATIONAL

1. Mason in February 2022.

2. Warning signs to prevent violence in schools
