Science research facility tours begin.

Agriculture and Food Research. Mason's team is among 100 projects that have been singled out for recognition based on a four-day audience survey. The team of seven experts from all across the globe will represent the United States as one of the International Science and Technology Prize for Advancing Development Goals (ISTP) Indonesia 2021 corporate winners. ISTP is a unique initiative that encourages collaboration between developing and developed countries, and it recognizes the contributions of science and technology to the achievement of the Sustainable Development Goals. 

For the third straight year, Mason is proud to be a part of the team of researchers working on the development of a saliva test that will help detect COVID-19.

Supporting the administration's continued emphasis on STEM education, the number of Mason students enrolled in school of Science and Technology (S&T) is on the rise. The number of students enrolled in the College of Science is up 32% compared to last year, and the number of students enrolled in the College of Engineering is up 25%. This is due to the department's focus on providing high-quality education and research opportunities.
