This event is hosted by the Human Rights and Global Justice Initiative. Hear from four Mason student activists on their powerful experiences and stories. This event is Registration Required.

Resistance and Resilience: Student Activism and Well-being

Refer to email for the meeting password.

April 1, 2021 to 2, 2021

Help connect our female Mason Science students with professional women in the sciences to learn about their national laboratories. Registration is required.

She Scientists: Health and Science Industry Week

Tuesday, March 30, 2021 | 5:30 p.m. – 6:30 p.m.

Function

Microbes and the Stories They Tell: Microorganisms as Sentinels of Organism Health and Ecosystem Health

March 30, 2021 | 4 to 5 p.m.

Hear the latest research on how the microbes in our bodies can tell us about our health.

The work of Geraldine Grant, Associate Professor, Department of Biology, College of Science, has recently appeared in Science Magazine, highlighting their work to make artificial intelligence (AI)-based Earth scientific workflows more shareable, replicable, reusable, and scalable.

The College of Science (CSISS), received $387,363 from the National Oceanic and Atmospheric Administration (NOAA) for a project titled "GeoWeaver: Layering Data and Models for Improved Prediction". This project is led by Elizabeth Grisham, Senior Researcher, Center for Spatial Information Science (CSISS).

Registered users are now able to access their selected content as well as their selected filters in a personalized Mountain Project page.

Call for proposals: DCA 2.0 Briefs

Researchers are busy, with preparations for the Undergraduate Research Colloquium (URC), Three Minute Thesis (3MT) competition, and March Madness for us takes on a new meaning (an aside for basketball fans, we are excited to welcome Kim English, Mason's new Men's Basketball coach). Researchers are busy, with preparations for the Undergraduate Research Colloquium (URC), Three Minute Thesis (3MT) competition, and March Madness for us takes on a new meaning (an aside for basketball fans, we are excited to welcome Kim English, Mason's new Men's Basketball coach).

Research Professor, Byung Youhwa Tang, associate director of the Institute for Digital innovAtion (IDIA) recently announced their first cycle of seed funding aimed at internally and with businesses, organizations, and agencies to collaborate on disruptive digital innovation. IDIA will select four compelling research projects in the College to the Mason community, featuring a judged student poster session and student abstracts are due by March 31.

Springtime at Mason

This is my first time experiencing the spring semester at Mason. And what a glorious time it is. The sun is usually shining and the cherry blossoms are sprouting across campus, and in our own backyards. The work of Geraldine Grant, Associate Professor, Department of Biology, College of Science, has recently appeared in Science Magazine, highlighting their work to make artificial intelligence (AI)-based Earth scientific workflows more shareable, replicable, reusable, and scalable.
