Spring initiatives — a key to STEM success

Join Dr. Erikca Brown, Office of DEI Inclusive Education Manager and Dr. Paula Danquah-Brobby, Director of Science Education at Mason, along with the Office of Diversity, Equity, Inclusion, and Community Engagement (DEI) and the Office of Sustainability to launch Mason’s Spring Initiatives. These initiatives, focusing on inclusive education, sustainability, and student well-being, are designed to advance Mason’s commitment to diversity and inclusion across the university and the Mason Science Community. You will hear from the offices leading these initiatives and learn how to support them in your courses and context.

Meet Provost Ginsberg and mingle with fellow adjuncts in this community-building event. Email RSVPs at provost.mason@gmu.edu. For details and to register for events, visit the Mason Science Community website.

Mason Science is being proactive about improving the health and safety of our community. Mason will hold a COVID-19 update meeting, starting Wednesday, February 8, 2023. The meetings will focus on communicating the latest updates on the changing status of the pandemic and its impact on Mason’s community. This is not a meeting for questions; rather, it is an informative update for all Mason community members.

Changes made to Fall 2022

After discussion with many university stakeholders, including the Faculty Senate, the fall 2023 start date will be Thursday, August 24. The spring 2023 start date will be Friday, January 26. Mason will close on December 22 and reopen on January 23. In addition, Mason will hold Homecoming week from February 10 to 18 with numerous activities, both virtual and in-person. The winter break for staff and faculty, which had been previously scheduled to begin December 21, will now be Dec. 21 – Jan. 1, 2024. Please check the campus calendar for an updated list of changes made to Fall 2022.

Get prepared for emergency situations

As part of Mason’s commitment to prepare our community for potential emergency situations, we offer State required emergency preparedness training due April 1. This training is designed to give employees a foundation of practical competencies and resources needed for emergency preparedness and crisis response. You can access the training in MasonLEAPS. Find out more about MasonLEAPS.

Volunteer & Giving

The Mason Science Community is open to volunteers from the Mason community and from the greater community. Opportunities for volunteers include serving on committees, participating in projects, or providing financial support to Mason Science. Mason Science is committed to building a strong and diverse community and we welcome all who are interested in volunteering.

Mason Science is a dynamic place where we can learn from each other and contribute to the greater community. Together, we can make a difference and create a better world. For questions or more information, please contact us.
