**Algorithm Studies in the Library**

**Toronto Mississauga Library**, that aims to enrich the intersections of critical algorithm studies with machine learning, and artificial intelligence? Recounting Algorithms is a two-day workshop, May 6, 2020. Those who should attend include faculty, staff, librarians, undergraduates, and graduate students, researchers, graduate students, artists, journalists and advocates.

How can libraries and archives best contribute to emerging critical discourses around algorithms, while proposals should be oriented toward the library as a context for sustaining and supporting instruction and critical inquiry, we encourage submissions from non-librarians, particularly from educators, researchers, graduate students, artists, journalists and advocates.

**Programming4Humanists**

**Programming4Humanists** provides courses designed to introduce participants to methodologies, creation, editing, and searchability of digital archives, but also introduce students to data mining and statistical analysis. The Spring 2020 Programming for Humanists (P4H) course will be two separate 8 week courses. Part I – Digital Editions, Start to Finish begins January 17, 2020 and statistical analysis. The Spring 2020 Programming for Humanists (P4H) course will be two separate 8 week courses. Part I – Digital Editions, Start to Finish begins January 17, 2020 and Part II – Python for DH Crash Course begins March 20, 2020 through March 6, 2020 and Part II – Python for DH Crash Course begins March 20, 2020 through March 6, 2020.

**Grants-in-Aid Program**

To budget for a 2-day trip to Houston for in-person training at Recovery.

**TrueRemove®**

Grants-in-Aid program is designed to provide a stipend to scholars for research and development of digital scholarship in the form of a digital publication and/or materials. The Grants-in-Aid program is designed to provide a stipend to scholars for research and development of digital scholarship in the form of a digital publication and/or materials.

**Building LLTDM**
