Global Innovation Fund

The Saltonstall-Kennedy Grant Program

Focus areas: wildlife; human journey; or, changing planet. Grants will be awarded for projects following program areas: Advanced Scientific Computing Research, Basic Energy Sciences, Financial Assistance Program FY 2020 Solicitation for the Office of Science environments.

Hubs, structured using a convergent science approach, at the nexus between coastal Coastlines and People

and ultimately manage Earth's natural resources for a more sustainable future.

projects that create and deploy AI tools to improve the way they monitor, model, understand, workflows that empower new scientific pathways.

Discovery Pathways

Cyberinfrastructure to Enable Community-level

Aims of such pilot projects can include, but are not limited to:

- Development of new workflows that enable scientific pathways.
- Advances in data management and analysis.
- Enhanced capabilities for modeling and simulation.
- Innovation in technology development.

Research that identifies biological, chemical, and/or physical reaction mechanisms for

and technologies for the treatment and remediation of per- and polyfluoroalkyl substances

products for CAM-CMA
