Globalization

Global Virtual Conference: The Ages of SDGs.

The National Geographic Society offers Early Career Grants which are focused on critically important coastlines and people research that is integrated with environments. The National Geographic Society and Microsoft's AI for Earth Program supports diverse, innovative, multi-institution awards that are designed to offer less than $1,000,000 for up to 12 months. In the second stage (Stage 2), up to 12 awards per track will be made for Planning Grants – each with a budget of up to $50,000 for four months to undertake pre-development activities.

The Civic Innovation Challenge aims to invest in social innovations that aim to improve the lives of people affected by COVID-19 health effects and the socio-economic impact of the virus. Aims of such pilot projects can include, but are not limited to: research on the prevention, ecological health.

Environmental Engineering program at NSF is to support research on the prevention, (PFAS) to improve and protect public and environmental health. The objective of the (ERASE-PFAS) is to develop and demonstrate technologies for the treatment and remediation of per- and polyfluoroalkyl substances (PFAS) at contaminated sites and to provide a sustainable solution for PFAS remediation.

Priority topics for this special funding focus include:

- Environmental Engineering: to develop and demonstrate technologies for the treatment and remediation of per- and polyfluoroalkyl substances (PFAS) at contaminated sites and to provide a sustainable solution for PFAS remediation.
- Epidemiology: to study the transmission dynamics and control of infectious diseases.
- Public Health: to develop and implement interventions to improve public health outcomes.
- Economics: to evaluate the economic impacts of climate change and climate change policies.
- Social Sciences: to study the social and cultural impacts of climate change.
- Geosciences: to study the physical processes and impacts of climate change.

In the first stage (Stage 1), up to 12 awards per track will be made for Development Grants—each with a budget of up to $1,000,000 for up to 12 months. In the second stage (Stage 2), up to 12 awards per track will be made for Planning Grants—each with a budget of up to $50,000 for four months to undertake pre-development activities.

Registration:

- Date: Tuesday, June 16, 2020
- Time: 9am
- Join Live Stream

The third session will explore how COVID-19 has intertwined with the global climate system, the effects of the SARS-CoV-2 virus and COVID-19 disease. This third session will include a presentation by Professor Robert Axtell, Computational Social Science Ph.D. Program, Department of Globalization. Deb Crawford, Vice President for Research, Innovation, and Economic Interim Provost and Executive Vice President Mark Ginsberg will address the importance of multidisciplinary research and collaboration among institutions.

Contact:

- Deadline: July 1, 2020
- Estimated number of awards: 24 to 32
- Funding source:
  - Global Innovation Fund
  - National Science Foundation
  - National Geographic Society and Microsoft's AI for Earth Program
  - National Oceanic & Atmospheric Administration
  - Mary Imogene Bassett Hospital & CDC
