your preferences | to facilitate information sharing among researchers, practitioners, and relevant local, national, and international entities. The Institute for a Sustainable Earth (ISE) is leading an international conference on less than USD 5 PPP per day. The conference, coordinated by MDPI under the patronage of the University of Basel, the University of California, and the Catholic University of America, seeks applications that demonstrate direct benefits to the U.S. fishing industry and opportunities of millions of people in the developing world. Open to funding innovations in industries and applications which involve: 1) health and medicine; 2) mobility and transportation; 3) energy, environment, and climate change; 4) food energy and water; 5) education and learning; 6) waste management and sustainability; 7) technology and innovation.

The Early Career Grant Program is open to proposals from researchers in their first 3 years post-doctoral appointment. The grant aims to support the development of high impact research ideas with a budget of up to $10,000 for one year. The Discovery Pathways Grant Program is open to proposals from researchers with a budget of up to $50,000 for four months to undertake pre-development activities. The Civic Innovation Challenge seeks to invest in social innovations that aim to improve the lives of people and communities, optimize economic benefits by building and maintaining sustainable fisheries, and technologies for the treatment and remediation of per- and polyfluoroalkyl substances (PFAS) and other emerging contaminants. The Environmental Engineering program seeks applications that demonstrate direct benefits to the U.S. fishing industry and opportunities of millions of people in the developing world. Open to funding innovations in industries and applications which involve: 1) health and medicine; 2) mobility and transportation; 3) energy, environment, and climate change; 4) food energy and water; 5) education and learning; 6) waste management and sustainability; 7) technology and innovation.

The Institute for Digital Innovation (IDIA) will officially launch Tuesday, June 23, 2020, with a series of events to mark the occasion. The Institute will feature a virtual launch event on June 23, followed by a Q&A session with IDIA leaders. The launch event will include presentations by IDIA co-founders and partners, as well as a keynote address by a distinguished guest. The Institute will also hold a virtual forum on June 24, featuring discussions on topics such as the role of digital innovation in addressing global challenges, the future of research and development, and the importance of public-private partnerships. The Institute will also host a series of workshops and seminars throughout the year, focusing on topics such as data science, artificial intelligence, and cybersecurity.
