Her wit, wisdom, and style garnered many fans throughout campus and her retirement processes, but at the center of everything she did were her campus clients.

**Fun Fact**

IPPS Logistics is transforming its carbon neutral last mile to provide a sustainable solution that reduces traffic congestion, lowers emissions, and saves customers time. To learn more, visit the IPPS Logistics website.

**NEW**

Carbon Neutral Last Mile

IPPS Logistics, in collaboration with Procurement and IT Services, is evolving its small business strategy. The IPPS Logistics team is excited to introduce our consolidated Student Mail Strategy, which brings smart solutions to the student mail process. The IPPS team has developed a consolidated Student Mail Strategy that transforms the student mail process into a holistic operation with advanced technology, increased safety, and expanded services levels.

IPPS Logistics vehicles are the first to sport the new UCSD-branded artwork in support of campus sustainability. The surfing vehicles are primarily in Baja California. UCSD Surplus Sales provided a safe, cost-effective, and convenient way for the Selena crew to transport their equipment to the show. They picked up lamps, artwork, and the microphone used by Selena during the show. The vehicles now sport the new UCSD-branded artwork, which includes a surfer design.

**Wastewater Sampling**

IPPS Logistics team also manages the collection of wastewater samples in support of Return to Learn. The crew was trained to safely collect the hazardous material from the campus. They retrofitted 70 wastewater machines to be deployed, and added 8 golf carts and 5 additional vehicles to their distribution fleet. The team now collects wastewater samples at 12 sampling stations located across campus twice a day. The same team collects the test samples from drop locations and transports the samples to labs for testing. To ensure sampling turnaround time for test results, the IPPS Logistics team is working on the next phase: extending the locker system to more locations to provide 24/7 access 365 days a year for parcel pickup.

IPPS Logistics is also implementing a new odor control system for the wastewater machines, which will improve the campus environment and increase compliance with environmental regulations. The odor control system will help reduce the unpleasant odor associated with wastewater treatment, which can be a concern for campus residents.
