Announcements

Process Change for General Project Re-Open Requests

- **Previously:** If a ticket is submitted to re-open a closed project, the request is processed, and the project is re-opened.
- **Effective March 28, 2022:** If a ticket is submitted to re-open a closed project, we will now confirm that the ticket has been submitted by a fund manager, fiscal manager, or business officer involved in the project **or** listed as a watcher on the ticket **before processing the request.**

This new change will remain with the next phase of the Project and Award Data Update Application (PADUA).

New P-Card Change Request Types Available in Concur

The Procurement Card (P-Card) team is excited to announce the launch of a new Concur enhancement that streamlines two popular P-Card requests!

1. Open a restricted Merchant Category Code (MCC)

2. Ship Goods to an Off-Campus Address

Cardholders and Administrators can begin using the new Concur P-Card change request types right away. The old process has been retired. **This means no more having to submit these requests via Services & Support!**

For questions about this process enhancement, please contact the Procurement Card Team via [Services & Support](#) [*About: Banking, Cash Card Products, Related to: Card Products, More Specifically: Procurement Card*] or visit us on Zoom during [P-Card Office Hours](#), Wednesdays @ 9:00am.

Resetting *Most Recently Used* in Concur

As a reminder, Concur will be clearing out the *Most Recently Used* section from the drop-down search menu for all GL chart string, project, & Approver fields.

Generally, the system lists any recent field selections in this section; however, if any GL chart string, project, or Approver information changes, what is listed in the *Most Recently Used* section would not be updated and may become obsolete. This effort is aimed towards removing outdated, invalid chart string/project values that may be sitting in users' *Most Recently Used* section.

Tips:

- Add your default chart string to your Profile (Concur > Profile > Profile Settings > Request/Expense Information, or check out the [WalkMe](#) walkthrough: *Complete Your Profile/Default Chart String*);
- As a best practice when completing your Request/Expense Report, search and select from the values shown below the gray horizontal line of the field's full drop-down menu – this list provides the most up-to-date values;
- Add a [Favorite Allocation](#) with frequently used chart string and project information; and/or
- Jot down your chart string or project information now and enter it in the Header/Allocations after the *Most Recently Used* section has been reset

PCI Update and Continued Merchant Support

Merchant Services and ITS have completed the annual PCI validation process with our QSA. The University has received a compliant status overall for this cycle. In an ongoing effort to support our credit card merchants and ensure that their solutions meet standards of compliance for both PCI and University policy, **we will be sending out a questionnaire to campus merchants** to verify details regarding:

- The current credit card environment
- Third-party services
- The administrators and staff who oversee credit card handling

We'd like to deeply thank all of the merchant teams for your help in this year's validation cycle, and we appreciate your continued partnership with us!

Tips & Tricks

Cost Transfer Frequently Asked Questions

I need to do a partial transfer. What do I do?

Partial transfers are a two-step process. First, split the transaction on the original project. Then, transfer one of the splits to the new project.

First Step:

- Navigate to Manage Project Costs (*Projects and Awards > Costs > right side task tray > Manage Project Costs*)
- Find and highlight the cost to be split, then go to *Actions > Costing > Split*
