The fixed mindset is particularly harmful to ENTP students because a fixed mindset holds that you are born that way, and it is hard or impossible to change. In the fixed mindset, people are either smart or not smart, good at math or not good at math, and anything good or bad is permanent. An example of a fixed mindset is saying “I can’t do math.” They may give up when they encounter academic challenges such as daunting projects or low grades, they give up, and they do not come back to try again. In the fixed mindset, we view intelligence as a capital asset to be preserved, not an opportunity to be improved. If we believe that we have it all figured out, or that we are not smart, then we will not explore the unknown and will stay where we are, in the comfort of mediocrity. We may make bold statements like, “I’ll never be any good at math,” or “I’ll never learn that.” The “never” word makes this mindset truly life limiting. When we have a fixed mindset, we get stuck in our understanding of the world and do not realize that we can learn new things, improve on our abilities, and become better at our endeavors. If we think that we can’t learn something, then we won’t try. The growth mindset is a way of thinking about ourselves and the world around us. In the growth mindset, we believe that effort and practice can lead to improvement. The growth mindset is the opposite of the fixed mindset and is the mindset that we should strive for. In the growth mindset, people believe that intelligence and ability can be developed through dedication and hard work. The growth mindset is the mindset that allows us to move forward and be successful in life.

The following is an example of a growth mindset statement: “I can learn this, and I will practice until I get it right.” In the fixed mindset, people would say “I can’t do this, I am not good at this.” The growth mindset allows us to see that things are not permanent, and that we can improve our abilities by working hard. People who embrace the growth mindset are more likely to try new things, learn new skills, and improve their abilities. They are not afraid of failure, and they use it as an opportunity to learn and grow. The growth mindset is the mindset that allows us to be resilient and to bounce back from setbacks. It is the mindset that allows us to believe that we can do anything we set our minds to. It is the mindset that allows us to be entrepreneurs and to create new ideas and businesses. It is the mindset that allows us to be creative and to think outside the box.

Our curriculum is based on the research Stanford psychology Professor Carol Dweck has conducted over five decades, and her seminal book “Mindsets: The New Psychology of Success.” It’s critical to look at the subject of entrepreneurship through a psychological lens. Hachette Book Group, 2012). The concept of growth mindset is essential to the development of an entrepreneur. It is the mindset that allows us to be resilient and to bounce back from setbacks. It is the mindset that allows us to believe that we can do anything we set our minds to. It is the mindset that allows us to be entrepreneurs and to create new ideas and businesses. It is the mindset that allows us to be creative and to think outside the box. The growth mindset is the mindset that allows us to be successful in life.

At 1871, we teach it through an entrepreneurial lens. Our curriculum is designed to help students develop the skills and mindset necessary to succeed in the world of entrepreneurship. We believe that everyone has the potential to be an entrepreneur, and we are dedicated to helping students unlock their entrepreneurial potential. Our students are given the opportunity to learn about entrepreneurship through hands-on experience. They are given the opportunity to work with other students, learn from each other, and to develop the skills necessary to succeed in the world of entrepreneurship. Our students have the opportunity to learn about entrepreneurship through a psychological lens. The concept of growth mindset is essential to the development of an entrepreneur. It is the mindset that allows us to be resilient and to bounce back from setbacks. It is the mindset that allows us to believe that we can do anything we set our minds to. It is the mindset that allows us to be entrepreneurs and to create new ideas and businesses. It is the mindset that allows us to be creative and to think outside the box. The growth mindset is the mindset that allows us to be successful in life.

Who can attend?

Undergrad and graduate students with an interest or focus in tech, marketing, sales, computer science, business development, and data analytics will make a great addition to one of 1871’s member companies or an 1871 internal team. ***Must be 18+ to attend.

Who can you contact with questions?

team, membership@1871.com

Apply here

By attending the internship fair, you will learn about opportunities at a variety of 1871 member companies and an 1871 internal team. Our 2020 Venture Design Challenge finalists are...
