advance to the finals YET. There's always next year…

Hachette Book Group, 2012).

Decade: Why Your Twenties Matter and How to Make the Most of Them Now. New York:

performed better in school overall and, at graduation time, they reported feeling

most associated with school were distress, shame, and upset. Those with growth mindsets

of college left the students with fixed mindsets feeling less confident. The feelings they

while the students with growth mindsets responded by working harder or trying new

followed across their four years of enrollment. When the students with fixed mindsets

students, freshmen were evaluated for fixed mindsets or growth mindsets and then

classroom rather than a delicate, fragile ecosystem to protect at all costs.

repeat and good things start to happen. With the growth mindset, their life becomes a

their face they know to make a list of three ways they could do better next time. Rinse and

Growth mindset students are liberated to try new things. And when (IF) they fall flat on

growth and development. This psychological training is critical to their future

struggles, criticism, and setbacks differently. Instead of being a threat or a referendum on

that you fail, and you're done, you're out of the game of life. No way!

setbacks. In the growth mindset, you come to realize that failure isn't all or nothing. It's not

impedes any real learning. When we take the defensive, fearful posture of "Don't

visionary moves. When we are afraid of making mistakes, we assume a defensive posture

In the fixed mindset, excessive concern with looking smart keeps people from making bold,

creative potential.

The fixed mindset is particularly harmful to ENTP students because a fixed mindset holds

sitting next to you, but you are most definitely not learning.

learning is taking place. When something comes easy to you, you may impress the co-ed

programming?

What is ENTP's growth mindset curriculum? And

how do we put it into practice in our classes and our

programming?

Our curriculum is based on the research Stanford psychology Professor Carol Dweck has
