What is ENTP's growth mindset curriculum? And how do we put it into practice in our classes and our programming?

Our curriculum is based on the research Stanford psychology Professor Carol Dweck has conducted over five decades, and her seminal book “Mindsets: The New Psychology of Success.” It’s critical to look at the subject of entrepreneurship through a psychological lens. In ENTP, we teach that effort is not shameful, but rather an indication that real success. When we help our students begin to adopt a growth mindset, they look at new challenges, struggles, criticism, and setbacks differently. Instead of being a threat or a referendum on us, they become opportunities. When we are afraid of making mistakes, we assume a defensive posture and don’t move, YET or innovative YET, but they will be! And ENTP faculty will help them unlock their entrepreneurial success.

Having a growth mindset, on the other hand, means embracing challenges, struggles and setbacks. It allows an individual to look at failure as a stepping stone towards growth and learning.

When we help our students begin to adopt a growth mindset, they look at new challenges, struggles, criticism, and setbacks differently. Instead of being a threat or a referendum on us, they become opportunities. When we are afraid of making mistakes, we assume a defensive posture and don’t move, YET or innovative YET, but they will be! And ENTP faculty will help them unlock their entrepreneurial success.

Practicing vulnerability is a sign of strength, and an incredibly powerful leadership tool. When we talk about failures and weaknesses, we show that we have an open mind and are willing to learn.

When something comes easy to you, you may impress the co-ed sitting next to you, but you are most definitely not learning. Learning is a process of trying new things, making mistakes, and growing. With the growth mindset, their life becomes a series of new experiences. When they encounter academic challenges such as daunting projects or low grades, they don’t give up, rinse and repeat and good things start to happen. With the growth mindset, their life becomes a series of new experiences.

“Practicing vulnerability is a sign of strength, and an incredibly powerful leadership tool.”
