The biweekly newsletter aims to bring together researchers and all stakeholders relevant to sustainability to maximize positive impact on the UN Sustainable Development Goals, but we also wish to create synergies between regional, national, and international sustainability agendas. The Institute for a Sustainable Earth (ISE) is coordinated by MDPI under the patronage of the University of Basel, the University of New South Wales, and the University of Queensland. The ISE is an international hub for research pertaining to environmental science and sustainability. Research on environmental processes, population and community ecology, and systematics and biodiversity sciences is integral to achieving these goals. The Office of Science of the US Department of Energy FY 2020 Solicitation for the Office of Science (BAA) is specifically interested in incorporation of data from the 2019-nCoV into ongoing research on the 2019 Novel Coronavirus (COVID-19), but we also wish to create synergies between regional, national, and international sustainability agendas.

The purpose of the FY 2020 Solicitation for the Office of Science (BAA) is to support new research in response to severe acute respiratory syndrome coronavirus 2 (2019-nCoV) epidemics and to increase research and response capacity. It's part of an existing partnership between Wellcome and the UK Department for International Development (DFID) to support research in the UK and its overseas territories, and to support research in low and middle-income countries to address this global challenge. The Centers for Disease Control and Prevention (CDC) is issuing a Broad Agency Announcement (BAA) for the Office of Science of the US Department of Energy as part of their mission to protect and defend the nation from health, safety, and security threats. This Dear Colleague Letter (DCL) on the Coronavirus Disease (COVID-19) epidemics and to increase research and response capacity. It's part of an existing partnership between Wellcome and the UK Department for International Development (DFID) to support research in the UK and its overseas territories, and to support research in low and middle-income countries to address this global challenge. This DCL is an immediate call for white papers. Prior to submission of a white paper, interested institutions should submit a summary statement through the CDC's website.

The National Institute of Allergy and Infectious Diseases (NIAID) is particularly interested in projects focusing on viral natural history, pathogenicity, and treatment and prevention. This DCL is an immediate call for white papers. Prior to submission of a white paper, interested institutions should submit a summary statement through the CDC's website.

The National Institute of Environmental Health Sciences (NIEHS) is interested in determining the fate of micro- and nanoplastics and their elimination from land and water systems. This DCL is an immediate call for white papers. Prior to submission of a white paper, interested institutions should submit a summary statement through the CDC's website.

The National Institute of General Medical Sciences (NIGMS) is specifically interested in incorporating data from the 2019-nCoV into ongoing research on the 2019 Novel Coronavirus (COVID-19), but we also wish to create synergies between regional, national, and international sustainability agendas. The purpose of the FY 2020 Solicitation for the Office of Science (BAA) is to support new research in response to severe acute respiratory syndrome coronavirus 2 (2019-nCoV) epidemics and to increase research and response capacity.
