The 8th World Sustainability Forum (WSF2020) is an annual event that brings together stakeholders from regional, national, and international sustainability agendas. The event will be coordinated by MDPI under the patronage of the University of Basel, the University of Geneva and the UN Sustainable Development Solutions Network (UN SDSN). The event will focus on key themes such as climate change, sustainable development, and environmental sustainability.

The Office of Science of the US Department of Energy funds applied aquaculture research projects to address issues related to: 1) Genetics of aquaculture species, 2) Aquaculture production systems, 3) Aquaculture husbandry practices, 4) Aquaculture waste management, and 5) Aquaculture outreach and education. The program supports research that addresses the urgent need for research on the 2019 novel Coronavirus (2019-nCoV). NIAID is particularly interested in projects focusing on viral natural history, pathogenicity, transmission, as well as projects developing medical countermeasures and suitable animal models.

The Centers for Disease Control and Prevention (CDC) is accepting proposals to conduct the following program areas: Advanced Scientific Computing Research, Basic Energy Sciences, Family and Community Prevention Research, and Epidemic Preparedness: COVID-19 Funding Call. These programs support research on the spread of COVID-19, to inform and educate about the science of virus transmission, as well as projects developing medical countermeasures and suitable animal models.

The CFPB Task Force is accepting proposals for the following program areas: Building an Inclusive Economy, Consumer Financial Services, Consumer Safety and Standards, and Telehealth Project (ROTP). These programs support research on financial inclusion, consumer protection, and telehealth services.

Virginia Environmental Justice Summit is a conference to engage undergraduate and graduate students in discussions about environmental justice issues. The conference invites qualified investigators to submit proposals for presentation at the summit.

The Integrated Translational Health Research Institute of Virginia (iTHRIVE): Using Data to Improve Health - UL 1 is a program that supports research on biosurveillance and the development and deployment of medical countermeasures. The program requires applicants to submit an application for Superfund Research Program (SRP) grants that focus on understanding the health effects of environmental pollutants.

Transcriptome Project is a program that supports research on environmental biogeochemical reactivity of pollutants in the environment. The program supports research on environmental microbiology, environmental chemistry, and environmental geophysics.

Virtual Earth Month is going virtual! We'll use this information to create a Virtual Earth Month calendar that showcases virtual programs, events, and initiatives that members of the Mason community are hosting. Earth Month is going virtual! 50th Anniversary of Earth Day is a program that supports research on the science of virus transmission, as well as projects developing medical countermeasures and suitable animal models.

Thank you,
