pressing sustainability and resilience challenges. Businesses and organizations–so that, together, we can more effectively address the world's regional, national, and international sustainability agendas.

The 8th World Sustainability Forum

If you are interested in submitting any of your current research, abstract submissions are now being considered for the DEB DEB 8th World Sustainability Forum. The Division of Environmental Biology (DEB) encourages the submission of proposals that tackle some of the most pressing sustainability and resilience challenges. Businesses and organizations–so that, together, we can more effectively address the world's regional, national, and international sustainability agendas.

The purpose of the FY 2020 Solicitation for the Office of Science

The purpose of the FY 2020 Solicitation for the Office of Science is to support new research in response to severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) and understand the spread of COVID-19, to inform and educate about the science of virus transmission.

Coronavirus Disease 2019 (COVID-19) has had a severe impact on the health of populations across the globe. The National Institutes of Health (NIH) and the National Science Foundation (NSF) have taken steps to support research on COVID-19. This includes funding for research on vaccines and therapeutics, as well as research on the social, economic, and behavioral impacts of the pandemic.
