The ISE Newsletter provides up-to-date information on conferences, funding opportunities, and research pertaining to environmental science and sustainability. The biweekly newsletter aims to provide the Mason community with a glimpse of innovative and impactful work that is taking place across campus. The ISE Newsletter endeavors to provide the Mason community with a glimpse of innovative and impactful work that is taking place across campus. The newsletter is intended to serve as a platform for the exchange of ideas, collaboration, and networking among faculty, students, and industry.

The 8th World Sustainability Forum (WSF2020)

Cognizant Program Officers to whom submission is contemplated.

The Office of Science of the US Department of Energy

The purpose of the Special Research Grants Program - Aquaculture is to provide research funds applied aquaculture research projects to address issues related to: 1) Genetics of aquaculture species, 2) Aquaculture sustainability, 3) Aquaculture production and management, 4) Economics of aquaculture, 5) Aquaculture and the environment, and 6) Aquaculture and public health. This program supports the development of innovative and sustainable solutions to global challenges related to aquaculture.

The National Institute of Environmental Health Sciences (NIEHS)

Funding source: National Institute of Environmental Health Sciences

The NIEHS encourages proposals that address the following research areas: 1) Environmental exposures, 2) Reproduction, 3) Development, 4) Cancer, 5) Neurological and developmental disorders, 6) Respiratory diseases, 7) Cardiovascular and metabolic diseases, 8) Infections and immunity, 9) Environmental factors and aging, and 10) Human health and the environment.

Several Directorates/Offices/Divisions welcome the submission of proposals on this topic, which includes: 1) Environmental Science, 2) Health Science, 3) Behavioral Science, 4) Public Health, 5) Social Science, and 6) International Health.

Sustainable solutions to the plastic waste problem require creative approaches from many fields. This Dear Colleague Letter (DCL) is issued to bring together researchers from diverse disciplines to discuss innovative solutions to the plastic waste problem. The letter is intended to stimulate collaboration and foster the development of new ideas and technologies that can help address this global challenge.

The letter is intended to stimulate collaboration and foster the development of new ideas and technologies that can help address this global challenge.

Epidemic Preparedness: COVID-19 Funding Call

Funding source: National Institutes of Health

NIAID is particularly interested in projects focusing on viral natural history, pathogenicity, and transmission. This program supports research that aims to understand the biology, epidemiology, and transmission of the coronavirus that causes COVID-19. The letter is intended to provide support for research that helps to prevent and control the spread of COVID-19.

The Office of Science of the US Department of Energy

Financial Assistance Program

The purpose of the Financial Assistance Program is to promote the development of innovative research projects that address issues related to clean energy, energy efficiency, and environmental sustainability. This program supports research that aims to develop new technologies and methods for reducing the impact of human activities on the environment.

The Virginia Environmental Justice Summit

The Virginia Environmental Justice Summit is an annual event that aims to bring together environmental justice advocates, activists, and policymakers to discuss the challenges and opportunities of creating a more just and sustainable world. The event is a platform for the exchange of ideas and the development of new strategies for addressing environmental justice issues.

The Virginia Environmental Justice Summit is an annual event that aims to bring together environmental justice advocates, activists, and policymakers to discuss the challenges and opportunities of creating a more just and sustainable world. The event is a platform for the exchange of ideas and the development of new strategies for addressing environmental justice issues.

Funding source: National Science Foundation

The National Science Foundation is issuing a Broad Agency Announcement (BAA) for the Virginia Environmental Justice Summit. This BAA seeks proposals that address the following research areas: 1) Environmental justice, 2) Climate change, 3) Air quality, 4) Water quality, 5) Solid waste management, 6) Soil quality, and 7) Community resilience.
