Your application for a travel grant was approved. Can you provide a budget to support your travel plans? If so, please find the project number and financial conflicts of interest that may affect the application.

To understand the impact, please review the new Blink page for Concur Documents. The cost transfers for Concur Documents are designed to streamline the process of transferring funds between projects. This tool is particularly useful for sponsored research projects, where transferring funds is a common practice.

For larger reports, use the built-in scheduling feature. This feature is designed to help you manage your reports effectively and ensure that they are completed on time. The scheduling feature allows you to set up regular reports and have them automatically generated and sent to you.

To support internal financial management of University finances, we have developed a number of dashboards and reports. The primary external-facing accounts receivable dashboard is designed to provide details about monthly invoices and payments. We have also developed a UCSD-DSH Accounts Receivable Panorama, which is a collection of reports designed to provide details about monthly invoices and payments.

We have also enhanced the visibility of wire request status and streamlined the request process for departments. The wire request form for payments to foreign suppliers (non-travel related) has been upgraded from PDF to an electronic, online form. The new form offers full visibility of wire request status and streamlines the request process for departments.

Oracle Financials Cloud provides comprehensive cost management solutions. Oracle Ledger/UCPath Labor Ledger Alignment ensures that payroll expenses are accurately reflected in the appropriate accounting records. The Oracle Procurement system allows you to extend our gratitude to all that served on the FIS Governance group and tabletop steering committee.

Budget and Delinquent Financial Reports are designed to provide details about monthly invoices and payments. We have also developed a UCSD-DSH Accounts Receivable Panorama, which is a collection of reports designed to provide details about monthly invoices and payments.
