Hope your 2019 is off to a fantastic start!

As I basked in the Clemson spirit in Santa Clara witnessing our Clemson Tigers win the national championship, I heard Coach Swinney say in his interview, “We were not chasing the national championship, we were focused on being the best we could be every day.” Chasing excellence yielded perfection for Clemson Football this year.

As we relentlessly pursue excellence in science, we may not have national championships, but we will have a tremendous positive impact on wearable sensors’ greatest scientific challenges and innovations.

Thank you for being such a vital part of the research, experience and education that happens every day at Clemson. We are grateful for your contributions and will make every effort to ensure that you will find your time here enriching and rewarding. We will continue to move forward together on this path of excellence and integrity, and you are a key part of Clemson and Science for the first time. Thank you for your dedication.

Your support helped build and outfit facilities to train and outfit student athletes every day on a cutting edge of science. You also funded the student experience, with impactful new programs and initiatives. We are grateful for your support to ensure that every student athlete gets the best possible experience. We are grateful for your support to ensure that only special Clemson experiences are on display, whereas everyone else’s experience is a proven memory.

So, here we look back at 2018 – What a Year! – I am reminded of that image of Coach Swinney and our student athletes locked arm-in-arm as they took the field. Join us academically, arm-in-arm, as we collectively focus on advancing SCIENCE.

Go Tigers!

Perfect in every way

Clemson University has an enviable athletic tradition and a history that dates back a century, from whose the Clemson Tigers became the first team in the modern era to go 15-0, earning the 2018-2019 season the “greatest college football team of all time.” The Tigers crushed the vaunted Alabama Crimson Tide 44-16 on Jan. 7 in Santa Clara, California. True-freshman quarterback Trevor Lawrence led the charge, playing with a calm and maturity well beyond his years. The following Saturday, tens of thousands attended a championship parade and celebration in downtown Clemson and at the stadium. The College of Science joins the Clemson University family in congratulating coach Dabo Swinney and his ultra-talented team of coaches and players. Up next: three out of four?

As today’s student leaders, Clemson’s ODK members are forging the future in a variety of ways

The Clemson Circle of Omicron Delta Kappa (ODK), which includes 30 members from the College of Science, sells and distributes about 2,000 honor stoles each academic year. The profits benefit the campus and external organizations in extraordinary ways.

Clemson researchers work with citizen-scientists to better understand diversity of rattlesnake venom

The discovery that Mojave Rattlesnakes have multiple venom types that are more widespread than previously believed required a large research collaboration between principal investigators, students and almost 100 citizen-scientists in five laboratories across the United States and Mexico. The research was published in Scientific Reports.
