Hope your 2019 is off to a fantastic start!

As I basked in the Clemson spirit in Santa Clara witnessing our Clemson Tigers win the national championship, I heard Coach Swinney say in his interview, "We were not chasing the national championship, we were focused on being the best we could be every day." Chasing excellence yielded perfection for Clemson Football this year.

As we relentlessly pursue excellence in science, we may not have national championships, but we will have a tremendous positive impact on society through groundbreaking scientific challenges and solving some of our world’s biggest problems.

Thank you for being such a big part of the Clemson family. Your gifts and support elevate the student experience with high-impact research and global experiences. Your generosity allows future and current Tigers the opportunity to have that very special Clemson experience: as doctoral students, undergraduate students, or grade school children who are inspired by our passion for science.

As we look back at 2018 – What a Year! – I am reminded of that image of Coach Swinney and our student athletes locked arm-in-arm as they took the field. Join us academically, arm-in-arm, as we collectively focus on advancing SCIENCE.

Go Tigers!

Perfect in every way

Clemson’s football team, which includes 90 members from the College of Science, went 15-0 during the 2018-2019 season, becoming the first team in the modern era to go 15-0. The team played with a calm and maturity well beyond their years.

As today’s student leaders, Clemson’s ODK members are forging the future in a variety of ways. The Clemson Circle of Omicron Delta Kappa (ODK), which includes 30 members from the College of Science, sells and distributes about 2,000 honor stoles each academic year. The profits benefit the campus and external organizations in extraordinary ways.

Clemson researchers work with citizen-scientists to better understand diversity of rattlesnake venom

The discovery that Mojave Rattlesnakes have multiple venom types that are more widespread than previously believed required a large research collaboration between principal investigators and almost 100 citizen-scientists in five laboratories across the United States and Mexico. The research was published in Scientific Reports.

Amazing stories are a beautifully designed and well-deserved recognition of the hard work put in by students who have excelled in the classroom. Clemson’s ODK members sell and distribute about 2,000 honor stoles each academic year. The profits benefit the campus and external organizations in extraordinary ways.
