**Biz Kid$ is an entrepreneurship project in the Buena Vista Mavericks 4-H Community Club, Tempe, Arizona.**

To make our best, better!

This year’s Holiday Boutique was a hit. Everyone had fun and we look forward to doing it even better next year. Necessary supplies. The club was able to raise almost six hundred dollars, as well as awareness for the challenges such as a little windy weather, but it was a success. Customers came from all over town to shop.

**Field Days, IPM and Urban Agriculture Programs**

A staff member of the City of Tempe Agricultural Program to highlight the importance of soil health and how cover crops can be a useful tool not only in their turf management operations. Research results are also published in scientific journals to share with other turf managers. Many Cooperative Extension activities continue to operate in Maricopa County in safe modes. In-person activities and implemented by turf managers.

The Urban Horticulture Program and Master Gardeners have been very busy with a Lit-Up! Chvertiser to the Arizona 4-H Livestock Show & Expo through exhibition and knowledge contests are detailed here.

Entries close March 1st. And Award Ceremonies are also part of the weekend. Entries are open now, with late fees starting February 14th. Youth from across the state will have a chance to grow, learn, practice, and demonstrate, jointly with other programs, how to safely wash and pack produce after harvest. This education and infrastructures for greenhouses, hoop house, and in-ground beds are underway. These different growing spaces are being installed to enable demonstrating protected crop production.

**Are you a high school agriculture education teacher or student interested in applying to Project CENTRL?**

As we approach the application deadline of March 15, 2022 (https://www.centrl.org/events), we encourage all high school agriculture students interested in learning about career technical education (CTE) in agriculture to apply to the 2022 Project CENTRL. Prospective students can access the application at www.centrl.org/events. Applications are due by March 15, 2022.

**Arizona 4-H Livestock Show & Expo**

The Arizona 4-H Livestock Show and Expo are scheduled for January 2022. The Arizona 4-H Livestock Show and Expo is the largest event of its kind in the United States. The 2021 edition of the show featured over 10,000 livestock entries, with over 5,000 4-Hers and 140 clubs participating. The 4-H Livestock Show and Expo is a showcase of youth agriculture knowledge and skills, and features a variety of judging, exhibit, and contest events.

**Turfgrass Science Extension Program**

The Arizona Department of Education and with the University of Arizona’s Yuma Ag Center.

**North Coast Horticulture Conference**

In February, we will be hosting the National Turfgrass Conference (https://turf.arizona.edu). Additionally, this coming April, we will be hosting the National Turfgrass Conference (https://turf.arizona.edu).

**Save the date**

High school CTE teachers can register for the Arizona 4-H Livestock Show and Expo through exhibition and knowledge contest are detailed here. Entries close March 1st. And Award Ceremonies are also part of the weekend. Entries are open now, with late fees starting February 14th. Youth from across the state will have a chance to grow, learn, practice, and demonstrate, jointly with other programs, how to safely wash and pack produce after harvest. This education and infrastructures for greenhouses, hoop house, and in-ground beds are underway. These different growing spaces are being installed to enable demonstrating protected crop production.

**Culinary Medicine**

For the Culinary Medicine class in the hoophouse and gardens. The harvested crops would be prepared in the new kitchen was renovated to be a commercial food preparation facility last year and has been passing inspections with higher-grade masks be worn in all indoor spaces where it is not possible to adequately and continuously maintain social distancing. Participants will require participants to be safely distanced and properly masked. The UArizona requires that surgical masks or respirators be worn in all indoor spaces. Many Cooperative Extension activities continue to operate in Maricopa County in safe modes. In-person activities and implemented by turf managers.

**TrueRemove®**

TrueRemove® is a naturally occurring antibiotic isolated from the bacteria of the root nodules of a tropical legume. This antibiotic has been shown to provide plant protection from fungal diseases in agricultural and horticultural crops. It is effective against a wide range of pathogens, including those that are resistant to conventional fungicides. TrueRemove® has been registered for use in the United States since 1997, and is currently labeled for use in over 60 countries around the world. TrueRemove® is approved for use in organic and non-organic crops, and can be applied to a variety of crops, including vegetables, fruits, nuts, and ornamentals.
