July UCPath System Enhancements

The following enhancements have been implemented in the UCPath system as of Monday, July 10, 2023:

**Improved ACA Notifications**
- New functionality automates employee Affordable Care Act (ACA) notifications about initial and standard measurement periods for eligibility changes, improving ACA efficiency and compliance.
- This change should be seamless for employees and locations, but is an efficiency improvement for UCPath.

**Automated Evidence of Insurability (EOI) Form**
- End-to-end automation streamlines the employee life insurance verification process and speeds receipt of EOI forms from Prudential.
- The vendor will send approval decisions directly to the UCPath Center to improve enrollment and coverage updates.

**Decommission E-Ledger**
- An update to the Endowments, Investments and Retirement Plan (I-128) interface supports UCOP’s transition to the Oracle Cloud Financials eLedger.
- These modifications improve transmission of systemwide UCPath data to the UCOP financial system.
- Additionally, the update will ensure financial data transmissions comply with the new systemwide common chart of accounts (CCOA) structure.

**Replace Online Title Code System**
- The new Job Code Lookup site will replace the current Title Code Web Inquiry System (TCS) site.
- The new site will provide salary plan, grade table/salary range information and job code details.
- The upgraded website improves data accuracy, adheres to accessibility guidelines and provides a user-friendly interface for mobile and tablet devices.
- After 30 days, the existing Title Code System link will be updated to go to the new site.
