Manuel Heitor will receive a Doctor of Science and Technology degree from CMU

The former **Portuguese Minister for Science, Technology and Higher Education (2015-2022)** is one of the **2022 Carnegie Mellon Honorary Degree Recipients**, one of the highest distinctions presented to an individual by Carnegie Mellon. Manuel Heitor will deliver, on May 13, the keynote address at the Commencement ceremony for master's and doctoral degree graduates and receive a Doctor of Science and Technology honorary degree. Manuel Heitor has been a longtime

supporter of the CMU Portugal Program and of all its initiatives, strengthening the relationship between Carnegie Mellon and the Portuguese scientific and innovation ecosystem throughout the years.

The 12th Lisbon Machine Learning School will take place in July with CMU Portugal support

The **LxMLS 2022** will take place between **July 24th and July 29th** at Instituto Superior Técnico. For the second year, CMU Portugal proudly associates to this yearly reference event. The school covers a range of machine learning topics, from theory to practice, that are important in solving natural language processing (NLP) problems arising in different application areas. It is organized jointly by Técnico, Instituto de Telecomunicações, INESC-ID, LUMIS, and Unbabel.

Webinar #3 | April 20: Registrations are still OPEN

The **3rd Webinar “Federated Learning: Methods, Applications and Challenges”** of the initiative **AIDA Webinar Series** will take place next Wednesday with Paula Silva (Research Assistant at INESC TEC) as speaker and Nuno Antunes (Assistant Professor at University of Coimbra) as moderator.

This event is part of a series of 5 Webinars organized by the coordination of the Large Scale Collaborative project AIDA with CMU Portugal support, on improving 5G risk management.

[Registration](#) to access the Zoom Webinar #3 is free but mandatory.

CMU Portugal Inside Story: Latifah Almaghraby

Latifah Almaghraby is a CMU Portugal student in ECE from Saudi Arabia, having started her Ph.D. in 2020 at the University of Aveiro in Portugal and CMU ECE Department from the College of Engineering.

Her research focuses on studying and modeling ECM-based neural scaffolds for spinal cord injuries. For her thesis, she investigates sustainable powering solutions for implanted medical devices co-advised at CMU

by Philip LeDuc and in Aveiro by Paula Marques and Pedro Fonseca.

"I was excited as, at that time, I was applying to different Ph.D. programs in the States and across Europe. The CMU Portugal Program combines both options beautifully." Latifah Almaghrabi
