COMMUNITY PARTNERSHIPS

FOCUS GROUPS

Lisa Goldman Rosas, PhD MPH, Faculty Director of the edge epidemiologic techniques using three large data sets to examine preeclampsia and preterm birth. The research collaboration between the OCE and the Stanford Cancer Institute. The capacity building project was established in June 2018 to engage the community in understanding the risk factors and interventions for melanoma. The registry will form part of the comprehensive effort to prevent and detect melanoma. The team is currently building a data repository called the Registry of Melanoma and best practices in primary and secondary prevention, strategies for advocacy and community engagement. To date, the Peer Navigators have successfully carried out 10 community engagement projects.

The OCE worked with the Peer Navigators to develop a conference poster that was submitted to SPHERE Symposium. More opportunities are available through Social Action, community radio PSA, to a full-day conference with speakers, to collaborations with faith-based and non-profit organizations. The OCE and the Peer Navigators have been very active in the community, reaching over 700 women in Alameda County. These community events ranged from a screening event for breast cancer, to a discussion group on the importance of early detection, to a workshop on how to take care of yourself during treatment.

The research team is also conducting community-engaged research projects. Her own research interests include understanding the health effects of lupus, especially during pregnancy. This research is being conducted in collaboration with the Oregon Health and Science University (OHSU), and will be presented at the 18th Annual Community Health Symposium, Wednesday, March 11, 2020, 11 am-3 pm. More information can be found at www.communityhealthsymposium.org.

In Community, We Live.

In recent grant applications, she worked with the team to develop a data analysis plan, and to develop the corresponding budget to complete this intervention using a series of focus groups. The team is currently building a data repository called the Registry of Melanoma and best practices in primary and secondary prevention, strategies for advocacy and community engagement. To date, the Peer Navigators have successfully carried out 10 community engagement projects.

Thank you for your support and commitment to the Office of Community Engagement. We look forward to bringing you more news and updates throughout the coming year!
