Call for Exploratory Research Projects

The Carnegie Mellon Portugal Program invites national and international researchers to apply for a short-term Andrew Carnegie Fellowship Research Grant. The fellowship supports projects with the potential for significant advances in the frontiers of knowledge. This year, the emphasis will be on projects that: (1) build on CMU’s expertise in Artificial Intelligence; or (2) address one of the major challenges that society faces, including but not limited to, climate change, sustainability, health, education, and the future of work. The fellowship is for new projects that will start between May 1st, 2021, and February 28, 2022, and have the final reports due by February 28, 2023.

Deadline: May 15th, 2021

CMU Portugal Faculty member and Faculty Researcher in Electrical and Computer Engineering, Reis S., was selected as the Andrew Carnegie Fellow for 2021. His research focuses on robustness and resilience in distributed systems, with applications ranging from cyber-physical systems to cloud computing and blockchain technologies.

CMU Portugal Faculty member and Faculty Researcher in Electrical and Computer Engineering, Reis S., was selected as the Andrew Carnegie Fellow for 2021. His research focuses on robustness and resilience in distributed systems, with applications ranging from cyber-physical systems to cloud computing and blockchain technologies.

Upcoming events

- The first CMU Portugal Session at Ciência 2021 was held on June 28th, 2021, in Lisbon. The event was organized by the CMU Portugal Program, in collaboration with the Lisbon OE, the CMU Portugal Portugal, and the CMU Portugal Portugal. The session showcased the latest research and developments in computer science and engineering, with a focus on interdisciplinary approaches.

CMU Portugal Publications

- The Cornell, Maryland, Max Planck Pre-doctoral Research School 2021: Emerging Research Trends in Computer Science, guest edited by the CMU Portugal Program, was published in the Journal of Computer Science in October 2021. The issue includes a special section on emerging research trends in computer science, with contributions from leading researchers from around the world.

- The Fraunhofer Portugal Challenge 2021 took place from November 16th to 18th, 2021, in Portugal. The event was organized by the Fraunhofer Portugal Challenge, in collaboration with the CMU Portugal Program. The challenge brought together researchers and industry professionals to work on real-world problems in the field of computer science.

- The Pfizer Awards 2021 - Health Sciences was held on December 1st, 2021, in Lisbon. The event was organized by the Pfizer Awards, in collaboration with the CMU Portugal Program. The awards recognized outstanding research contributions in the field of health sciences.

- The Pfizer Awards 2021 - Health Sciences was held on December 1st, 2021, in Lisbon. The event was organized by the Pfizer Awards, in collaboration with the CMU Portugal Program. The awards recognized outstanding research contributions in the field of health sciences.

- The Deadline for applications to CMU Portugal Call for ERPs was announced on January 1st, 2022. The call invited researchers from around the world to apply for a short-term collaboration at CMU Portugal.

- The DCE 2021 | Doctoral Congress in Engineering | Symposium on Biomedical Engineering took place from June 28th to July 2nd, 2021, in Lisbon. The event was organized by the DCE 2021 | Doctoral Congress in Engineering | Symposium on Biomedical Engineering, in collaboration with the CMU Portugal Program. The symposium provided a platform for researchers to present their latest work in the field of engineering and biomedicine.

- The PBM (Portugal Biomedical Engineering Meetings) 2021 was held on July 9th, 2021, in Lisbon. The event was organized by the PBM (Portugal Biomedical Engineering Meetings), in collaboration with the CMU Portugal Program. The meetings provided an opportunity for researchers to network and discuss their latest research in the field of biomedical engineering.

- The LxMLS 2021 will take place from August 2nd to 7th, 2021, in Lisbon. The event is organized by the LxMLS (Lisbon Machine Learning Symposium), in collaboration with the CMU Portugal Program. The symposium provides a platform for researchers to present their latest work in the field of machine learning.

- The CMU Portugal Faculty member and Faculty Researcher in Electrical and Computer Engineering, Reis S., was selected as the Andrew Carnegie Fellow for 2021. His research focuses on robustness and resilience in distributed systems, with applications ranging from cyber-physical systems to cloud computing and blockchain technologies.
